Notes

These district profiles use the census geographies for the Texas house and senate legislative districts corresponding to PlanH2316 and PlanS2168.

Comparisons to previous profiles should be made with caution. In some past profiles, including the 2017-2021 vintage, districts were compiled by aggregating block group data since census geographies did not correspond to the legislative plans in effect at the time in Texas. Additionally, the Census Bureau advises against comparing estimates from overlapping 5-year periods.

The ACS data is gathered from surveys distributed to a sample of the population. The margin of error (MOE) that accompanies each of the estimates is available upon request from TLC. The MOE indicates the reliability of these estimates.

State and district percentages are based on the totals in the general category shown above each group and marked by a gray bar. The district profiles do not include state and district percentages for the special populations group or the variables that illustrate average values. For these variables, the state estimate is provided.

For information about census variable definitions and methodology, please consult the ACS technical documentation available at the following URL: https://www.census.gov/programs-surveys/acs/technical-documentation.html
